Education

University of Waterloo

Sep 2024 to Apr 2029

BCFM in Computing & Financial Management

- **Majors:** Computer Science, Accounting & Finance
- **Coursework:** Analyzing Financial Markets in Python, Designing Programs, Algorithm Design and Data Structures, Techniques for Software Development, International Business

Projects

AlzGuard – YIC (Youth Impact Challenge) Winning Project

[GitHub Link](#) 

- Developed the front-end and AI model using React, Python, HTML, and CSS for an Alzheimer's detection tool aimed at physicians, which won a \$1,000 prize at YIC.
- Aided in developing a convolutional neural network (CNN) to classify images and clinical data to determine the likelihood of a patient having Alzheimer's Disease
- Collaborated in a team of three to integrate machine learning models (Random Forest, Meta Classifier) for analyzing MRI scans.

NLP Webscraping Tool

[GitHub Link](#) 

- Built an AI-Powered Webscraper that can pull data from any website, given a prompt, using a Meta's Ollama AI (Llama ver. 3.2).
- Utilized Natural Language Processing (NLP) to automatically scrape desired content of any kind based on a user prompt from a given website URL.
- Designed front-end in React.js Framework and the Selenium Python Package.

Random Forest Classifier for Stock Predictions

[GitHub Link](#) 

- Developed a custom predictive analytics tool to forecast stock price movements based on historical financial data over the past 10 years.
- Makes use of financial technical indicators and the machine learning algorithm was then trained on stock prices, trading volumes with a Random Forest Classifier built using Scikit Learn in Python
- Data is taken from Yahoo Finance using the yfinance library in Python and recommends a stock that has a greater than 55% chance of rising in value.

Experience

Telecommunications Consultant Intern

Toronto, ON

Canada Cartage System Limited

Jun 2022 to Aug 2022

- Managed server-side telecommunications systems, optimizing network performance and ensuring seamless communication across multiple departments.
- Analyzed and maintained telecommunications data to ensure compliance with industry standards and internal policies.
- Collaborated with IT teams to implement scalable communication solutions, supporting the company's logistics and transport operations.

Technologies

Languages: C/C++, Python, Dart, SQL, Java, JavaScript, HTML, CSS

Libraries/Frameworks: Matplotlib, NumPy, NumPy Financials, pandas, yfinance, Flask, Selenium, BeautifulSoup, React.js, Flutter

Tools/Technologies: Visual Studio Code, Android Studio, Jupyter Notebooks, LaTeX, Next.js, MongoDB, Blender, Git/GitHub, Figma
